

PROJECT:

CUSTOMIZE PHOTO FRAME ONLINE SHOPPIN SYSTEM

Entity: Customized Photo Frame

Customized Photo Frame Online Shopping System, an entity represents a real-world object whose information is stored in the database.

The main entities are,

- Customer
- Customized Photo Frame,
- Order, and
- Payment.

Example:

A Customized Photo Frame is an entity because the system stores its details such as Product_ID (PF101), Product_Name (Wooden Family Frame), Frame_Size (8 × 10 inch), Price (₹500), and Stock (20).

Attributes:

Customized Photo Frame Online Shopping System, attributes are the details properties of each entity.

Example:

The Customized Photo Frame entity has attributes such as Product_ID, Product_Name, Product_Type, Frame_Size, Price, and Stock.

Product_id	Product_name	Product_type	Frame_size	price	stock
PF0013	Nandhini	Customized Name Photo Frame.	8 × 10 inch	₹650	10

Primary Key:

Customized Photo Frame Online Shopping System, a primary key is a unique attribute used to identify each record in an entity.

Example:

Product_ID uniquely identifies each customized photo frame, and Customer_ID uniquely identifies each customer.

Product details:

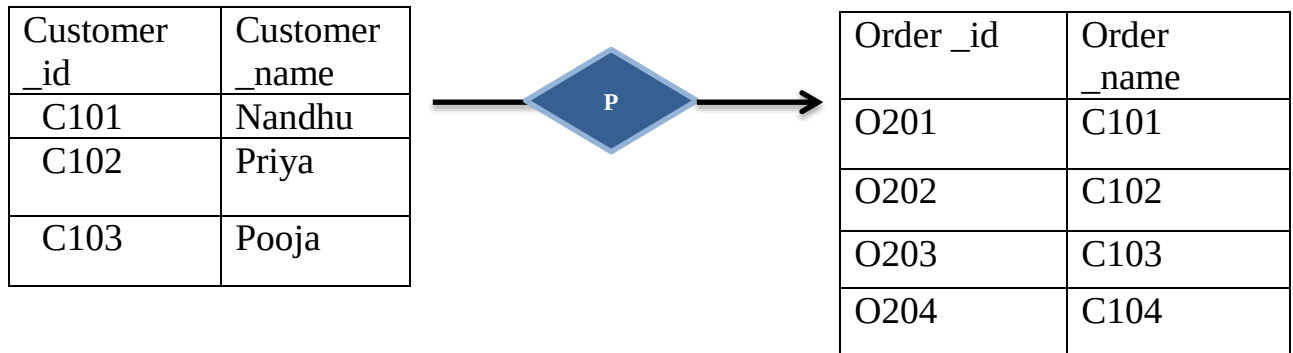

Product_id	Product_name
PF0013	Nandhini

Relationship:

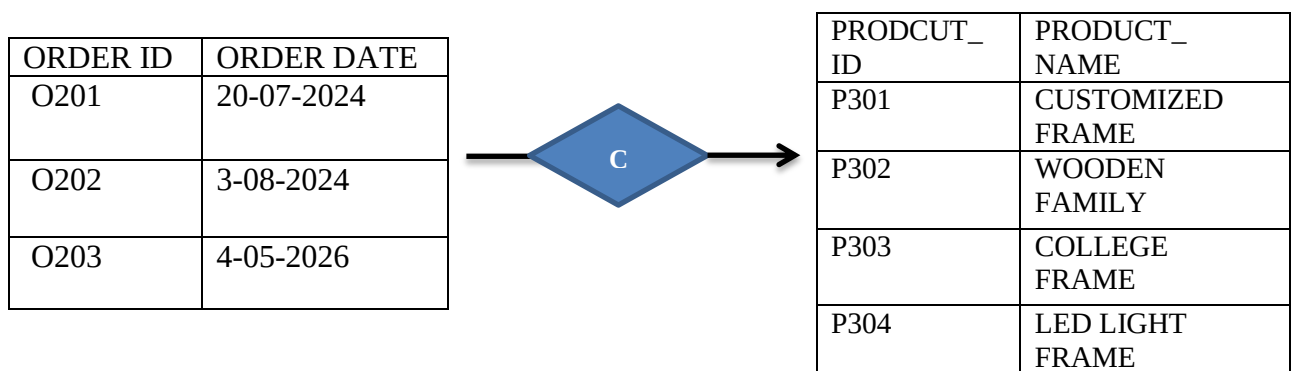

Customized Photo Frame Online Shopping System, a relationship shows how the entities are connected. A customer places orders, an order contains customized photo frames, and each order is associated with one payment.

Example:

Type 1: CUSTOMER → ORDER [One -to- Many]

Type 2: ORDER → CUSTOMIZED FRAME [Many -to-Many]

Type 3: ORDER → PAYMENT [One - to -One]
